PROFESSIONAL SUMMARY

Front-End / Full-Stack Developer with a Bachelor's degree in Administrative Informatics and hands-on experience building web applications, RESTful APIs, and automated document-generation systems. Skilled in Angular, TypeScript, Laravel, and Node.js, with a track record of leading small development teams, modernizing legacy systems, and delivering reliable, scalable solutions under real production constraints.

EDUCATION

Bachelor's Degree in Administrative Informatics — Universidad Nacional Autónoma de Honduras (UNAH), Tegucigalpa, Honduras.

PROFESSIONAL EXPERIENCE

Front-End Developer — Internship / Professional Practicum

Directorate of Technology Management (DEGT) — UNAH, Tegucigalpa, Honduras | Jan 2026 – Sep 2026

- Developed and implemented modern, interactive user interfaces for the Registro V5 academic platform, applying a modular front-end architecture with reusable components in Angular 21 and strict-mode TypeScript.
- Consumed RESTful APIs to process and manage large volumes of academic and administrative data, supporting multiple modules and institutional user roles.
- Coordinated and provided technical guidance to a team of interns on behalf of project leads, enforcing coding standards, resolving technical issues, and streamlining collaborative workflows.

IT Department Supervisor

PCservices – IT Support for Grupo W, Tegucigalpa, Honduras | Jan 2025 – Jan 2026

- Managed servers and technology infrastructure, ensuring high availability, performance, and security of information systems.
- Maintained relational databases and automated backup routines to prevent critical data loss.
- Provided continuous platform monitoring and specialized technical support to end users and operational areas.

Full-Stack Developer — Crefisa / Logix Project

Document Management & Credit Application System | Sep 2024 – Aug 2025

- Built a web system to centralize client information and automate document generation for auto-loan and insurance credit applications.
- Implemented a workflow that automatically generates up to 14 PDF documents (loan applications, insurance applications, authorization letters, and supporting documentation) from a single form, eliminating duplicate data entry.
- Developed the front end in Laravel for centralized client and application management; built the back end in Node.js to handle data processing and dynamic document generation.
- Designed the MySQL database to centralize client, application, and document-generation data.

TECHNICAL SKILLS

- Programming Languages:** SQL, PL/SQL, Python, Java, JavaScript, TypeScript, PHP
- Web Development:** Angular, Material Design, Bootstrap, HTML/SCSS, Node.js, Laravel, REST APIs, Postman, Insomnia
- Cloud & Infrastructure:** Google Cloud (Virtual Machines), AWS (basic level), Linux/Windows Server administration
- Version Control:** Git, GitHub
- Databases:** PostgreSQL, MySQL

SOFT SKILLS

- Leadership:** Technical leadership and team coordination
- Problem-Solving:** Analytical troubleshooting and root-cause resolution
- Communication:** Clear, effective communication with technical and non-technical stakeholders
- Collaboration:** Cross-functional teamwork in fast-paced environments
- Adaptability:** Quick learner, adaptable to new technologies and requirements
